» Using paper forms for Field Reports costs you \$15 per form!*

Every time your field staff submits a paper form to your office – daily reports, time cards, work orders, payment authorization, etc. – it costs your business \$15 or more!

How can this be? When the American Payroll Association (APA) commissioned a study by Robert Half Agency to study how offices handle paper forms, they found the following waste: each form is handled by 3-4 people as the data is reviewed and entered, the form is copied as many as 5 times, and the person filling out the form must take the time and gasoline to drive that form into the office.

The results of the APA study also concluded that automating the same form could reduce the cost as much as 80%. This is a \$12 savings for each paper form with electronic transmittal of that information.

With JumpStart Wireless™ Field Reports for Sage Timberline Office your field staff collect information using off-the-shelf, inexpensive, and easy-to-use cell phones or BlackBerrys. Once the information is entered into the device using JumpStart's easy-to-use screens, it is immediately transmitted to Sage Timberline Office.

JumpStart Wireless Field Reports allow entry of weather conditions, labor, equipment usage, sub-contractor charges, materials received, and comments regarding activities on the job. The process automatically loads the device with pick-lists for selecting employees assigned, equipment on the job, approved sub-contractors and appropriate cost codes for charging job cost.

JumpStart Wireless customers recover their costs so quickly we go beyond "return on investment" to **Rapid Economic Justification**, typically in 1-2 months. Calculate your own rapid economic justification at <http://www.jumpstartwireless.com/roi>.

How can long can you afford to lose \$12 for every paper form submitted by your field staff?
