Solution Technology Inc. Announces Partnership with JumpStartWireless

Today Solution Technology, Inc., maker of ArmorPlus for BlackBerry®, announced a partnership with JumpStart Wireless, developer of BusinessSuite to jointly market ArmorPlus ruggedized multi-function wireless platform for BlackBerry® together with the JumpStart Wireless' BusinessSuite platform for wireless business solutions software. For more information please visit <http://www.armorplus.com> and <http://www.jumpstartwireless.com>.

Solution Technology's durable ArmorPlus handset technology for BlackBerry applications is designed for mobile workers operating in harsh environments ranging from construction to law enforcement. The JumpStart Wireless BusinessSuite affordably replaces existing paper forms with wireless devices, extending existing enterprise billing and management software systems out to mobile staff.

ArmorPlus for BlackBerry combines a durable impact-resistant case with wireless applications to transform today's BlackBerry devices into rugged multi-function communications platforms to handle the most demanding data needs of large mobile enterprises.

As a rugged multi-function communications tool, ArmorPlus for BlackBerry is designed for real world work environments by integrating wireless bar code scanning, touch screen for signature capture and GPS functionality into a form fitted, high durability impact resistant case.

ArmorPlus is perfectly suited for field services personnel, construction workers, law enforcement officers, and other heavy duty users of wireless applications in demanding environments. ArmorPlus for BlackBerry is tested to withstand multiple three meter drops onto concrete. Its interlocked case protects the BlackBerry handheld computer from impact regardless of direction. The impact resistant window protects the BlackBerry LCD screen from point impacts.

Solution Technology, Inc.'s ArmorPlus together with the JumpStart Wireless BusinessSuite delivers work orders, site reports, inspections, punch lists, time cards, and survey forms on a powerful, rugged computing platform. Eliminating the cost of collecting, transmitting, and keying in paper reports, ArmorPlus and BusinessSuite deliver field information directly into existing

enterprise billing and management software systems. Customers report rapid payback and more productive mobile staff, saving as much as \$300 - \$500 per mobile staff member per month.

"ArmorPlus allows our construction and home building customers to expose their BlackBerrys to harsh environments and still produce dependable performance and results, " said Jeff Bonar, CEO and President of JumpStart Wireless. "Finally, BusinessSuite's ease-of-use and affordability is available in a rugged and affordable computing platform."

"ArmorPlus and JumpStart Wireless' BusinessSuite offer a breakthrough in flexible and wireless connectivity for companies looking for durable, cost-effective solutions for their mobile workforce that not only integrate with existing IT infrastructure, but can also survive harsh operating environments, " said Dan Doczy, CEO of Solution Technology Inc.

About JumpStart Wireless Corporation

The JumpStart Wireless BusinessSuite™ affordably extends existing corporate software applications to mobile workers using wireless handheld devices. JumpStart's patent pending Form Engine™ automates existing paper forms, including work orders, daily reports, punch lists, inspections, and timecards. Eliminating the cost of collecting, transmitting, and keying in paper reports, BusinessSuite delivers field information directly into existing enterprise billing and management software systems. BusinessSuite customers report rapid payback and more productive mobile staff, saving as much as \$300 - \$500 per mobile staff member per month. BusinessSuite is easy to use, easy to deploy, works with popular and inexpensive devices, and integrates with most existing enterprise software.

BusinessSuite includes GPS location services, credit card swipe, bar code reading, and printing. It runs on a wide variety of mobile phones and wireless PDAs. BusinessSuite applications are tailored to meet the unique requirements of each customer. Sophisticated wireless capabilities – disconnected operation, embedded security features, device independence, and centralized management – are automatically built into every BusinessSuite application.
