MAXIMUS Signs Reseller Agreement with JumpStart Wireless Corporation

Reston, VA — MAXIMUS (NYSE:MMS), a leading provider of health and human services consulting, program management, and information technology solutions announced today that it has entered into an agreement to become a reseller of JumpStart Wireless™ Corporation's BusinessSuite™ wireless technology. MAXIMUS will deploy the technology as an enhancement to its current facilities management software applications.

BusinessSuite™ relies on innovative artificial intelligence technology to provide open, flexible wireless solutions that are compatible with most Internet-enabled wireless devices (Web-connected cellular phones and PDA's) using virtually any wireless operating system, including Palm OS®, Java Runtime, Pocket PC, SmartPhone, and Symbian EPOC™. The standard BusinessSuite™ offering allows field personnel to remotely access frequently-used business forms, such as work orders, timesheets, check lists, delivery orders, problem reports, inspection reports, inventory monitoring, and order entry forms.

Using BusinessSuite™ technology, JumpStart and MAXIMUS are jointly developing a wireless application and data connector that will become core components of MAXIMUS industry-leading facilities management applications, FacilityMAX™ and FacilityFocus®. The new application will provide wireless data connectivity to mobile or remotely-dispatched maintenance personnel, enabling them to receive work orders in the field, enter time card information, and update statuses.

“Our partnership with JumpStart allows us to deliver powerful wireless functionality that will enable our customers to maximize their investment in wireless technology,” said Ken Slaughter, Executive Vice President for MAXIMUS Asset Solutions division. “By offering an affordable, flexible, and easy-to-use wireless solution, we can help our customers to become more agile by reducing paperwork, improving service delivery, increasing worker productivity, and improving the timeliness and accuracy of data collected in the field. Early adopters are already witnessing dramatic improvements in operational efficiency, and we’re excited about the broader potential of BusinessSuite™.”

“Through our partnership with MAXIMUS, our joint customers will extend their investment in world-class facility management software to world-class mobile work management,” said Jeff Bonar, CEO and Founder of JumpStart Wireless. “BusinessSuite extends FacilityMAX™ and FacilityFocus® out to the front-line of work. Because front line data is easier to provide and use, facility service organizations are better able to managing costs while also increasing effectiveness and productivity.”

About JumpStart Wireless Corporation

JumpStart Wireless provides the most complete and most cost effective solution for linking a company's mobile workers to key corporate computer applications. The BusinessSuite™ product automatically generates applications that are easy to use, deploy, and manage without expensive and complex integration and development projects. BusinessSuite extends a customer's existing software products to the handheld devices of mobile workers and allows each customer to tailor the application to meet its unique requirements. Sophisticated wireless capabilities – disconnected operation, embedded security features, device independence, and centralized management – are automatically built into every application. With JumpStart's proprietary innovations, wireless business software no longer requires expensive custom programming or systems integration. JumpStart applications also include GPS location services, credit card swipe, bar code reading, and printing in the field using cell phones and other wireless handhelds. For more information, visit www.jumpstartwireless.com or contact sales at 561/243-4700 x 200.
