

BusinessSuite™

WIRELESS WORKFORCE MANAGEMENT

HOW IT WORKS...

1

Enter information on a web page configured for your business.

2

Intuitive and easy-to-use task lists, time cards, inspection reports and work orders are immediately delivered to affordable mobile devices. Field staff review details, enter start and finish times, part numbers, instrument readings, expenses and other data specific to your business.

3

Critical information is delivered automatically and immediately back to your office, dispatcher, accounting systems, etc. Data integrates effortlessly with back-office business software and GPS maps.

WHAT COULD BE SIMPLER?

A *profitability breakthrough* for businesses with mobile staff. Wasted travel time, constant interruptions, late, inaccurate and lost paper work kill productivity and profits. BusinessSuite is a wireless work management system that simplifies and accelerates activity tracking, time cards, work orders, inspection reports and similar business forms. Make your field staff more efficient and your office operations simpler. Improve your ability to serve customers. It's affordable, easy-to-use, easily tailored to your business needs, and pays for itself in a few months.

All the benefits of FedEx, Sears and GE's wireless systems for \$1 a day

“BusinessSuite has greatly boosted our productivity by eliminating the paper used to go back and forth between our trucks in the field and head office... the transition from paper to wireless was painless.”

*Chris Cheek, President
ProLake Management based in Michigan*

WIRELESS

FOR YOUR FIELD STAFF completing work couldn't be

simpler

EASY TO USE

Every part of BusinessSuite is easy to use, from its handheld device screens to its seamless integration with popular business software. For your field staff, completing work couldn't be simpler: start and stop times are automatically filled in, workers are prompted with inspection questions, part numbers and expenses are entered right from the device keypad or barcode scanner. BusinessSuite continues to work even when your staff are outside of the mobile phone coverage area.

ELIMINATE PAPERWORK

BusinessSuite eliminates paper. Enter the data once in the field and it automatically updates your office software. No more illegible notes to decipher, missing information, or mountains of paperwork waiting to be entered into the system.

INTEGRATES INTO YOUR EXISTING BUSINESS SOFTWARE

Setting up wireless work for your company is easy. Data can be imported and exported between BusinessSuite and many popular business applications such as SQL Server and Excel, using multiple formats including SQL, CSV, text files, XML, and tab-delimited.

AFFORDABLE

For approximately a dollar per day per worker, BusinessSuite offers you the same productivity, profitability and customer service benefits that companies like FedEx, Sears, GE, and IBM spent hundreds of millions of dollars building for their field staff.

TRACK YOUR FIELD STAFF WITH GPS

With GPS enabled wireless devices, you can display maps with your field staff's location, travel route, speed and more. BusinessSuite goes beyond GPS only systems by adding integrated work orders, time cards and other business forms.

SOPHISTICATED REPORTING FEATURES

With BusinessSuite's sophisticated reporting tools, you can track worker productivity, hours worked per job, time spent traveling, as well as parts and expenses associated with each job.

BENEFITS

Rapid Payback: Companies typically recover the cost of new equipment in a few months.

Increase productivity: Instant dispatching, accurate time cards, fewer interruptions, no duplicate data entry, eliminate paperwork.

Increase revenue: More calls per employee.

Increase cash flow: Invoice as work is completed.

Increase customer satisfaction: Quicker response times, better prepared workers.

Configure for your business: Customize work orders, time cards, site reports, inspection forms and other forms specific to your business needs.

Work with your existing software: Extend your business software out to your mobile workforce.

Easy to learn and use: Minimal training required.
